Wayne Water Districts	0.041
West Carteret Water Corporation	0.030
West Wilkes Water Association, Inc.	0.035

*Mean calculated using all available sample results under EPA UCMR for NC public water systems. This includes samples taken at the treatment plant or well as well as from the distribution system. If no hexavalent chromium was detected, the detection limit of the lab (typically 0.03ppb) was used for the purposes of calculating the mean. The number of samples per system varied widely, from 4 to 237 samples, depending on the size of the system and number of water sources.
